Audit Report Date: April 6th, 2019.

## eMal iOS and Android Applications Security Assessment Certificate

This certificate is issued to certify that Hacken performed security assessment of:  
eMal Android and iOS mobile applications

On final testing of eMal applications as reflected in our report dated Aug 6<sup>th</sup> 2019, we found that there were no vulnerabilities or loop holes and hereby officially certify eMal mobile applications as highly secure"

Andrii Matiukhin

Chief Technology Officer

21 August 2019

A handwritten signature in blue ink, appearing to read "Andrii Matiukhin", written over a large, faint, stylized "HACKEN" watermark.

### Disclaimer

The audit does not give any warranties on the security of the code. We always recommend proceeding to several independent audits and a public bug bounty program to ensure the security of the smart contracts.

Smart contracts are deployed and executed on blockchain platform. The platform, its programming language, and other software related to the smart contracts can have own vulnerabilities that can lead to vulnerabilities.
